**CANTILEVER RACKS**

Atlas Mega Steel manufactures the highest quality, full-line assortment of material handling and storage equipment in the industry. Our products combine years of proven engineering with the latest technology and supply chain practices. With manufacturing plants strategically located throughout the world, we can provide the right solution for every storage application. By maintaining a strong economic focus along with our commitment to the most stringent quality standards, Atlas Mega Steel is your complete global storage solution.

## CANTILEVER RACKS

Cantilever racks use arms to hold products, which can be completely accessible from the front without any of the horizontal restrictions of traditional pallet racks, this allows materials of varying lengths to be stored eliminating the need for a front column. This allows easy loading and unloading, reducing handling time and costs.

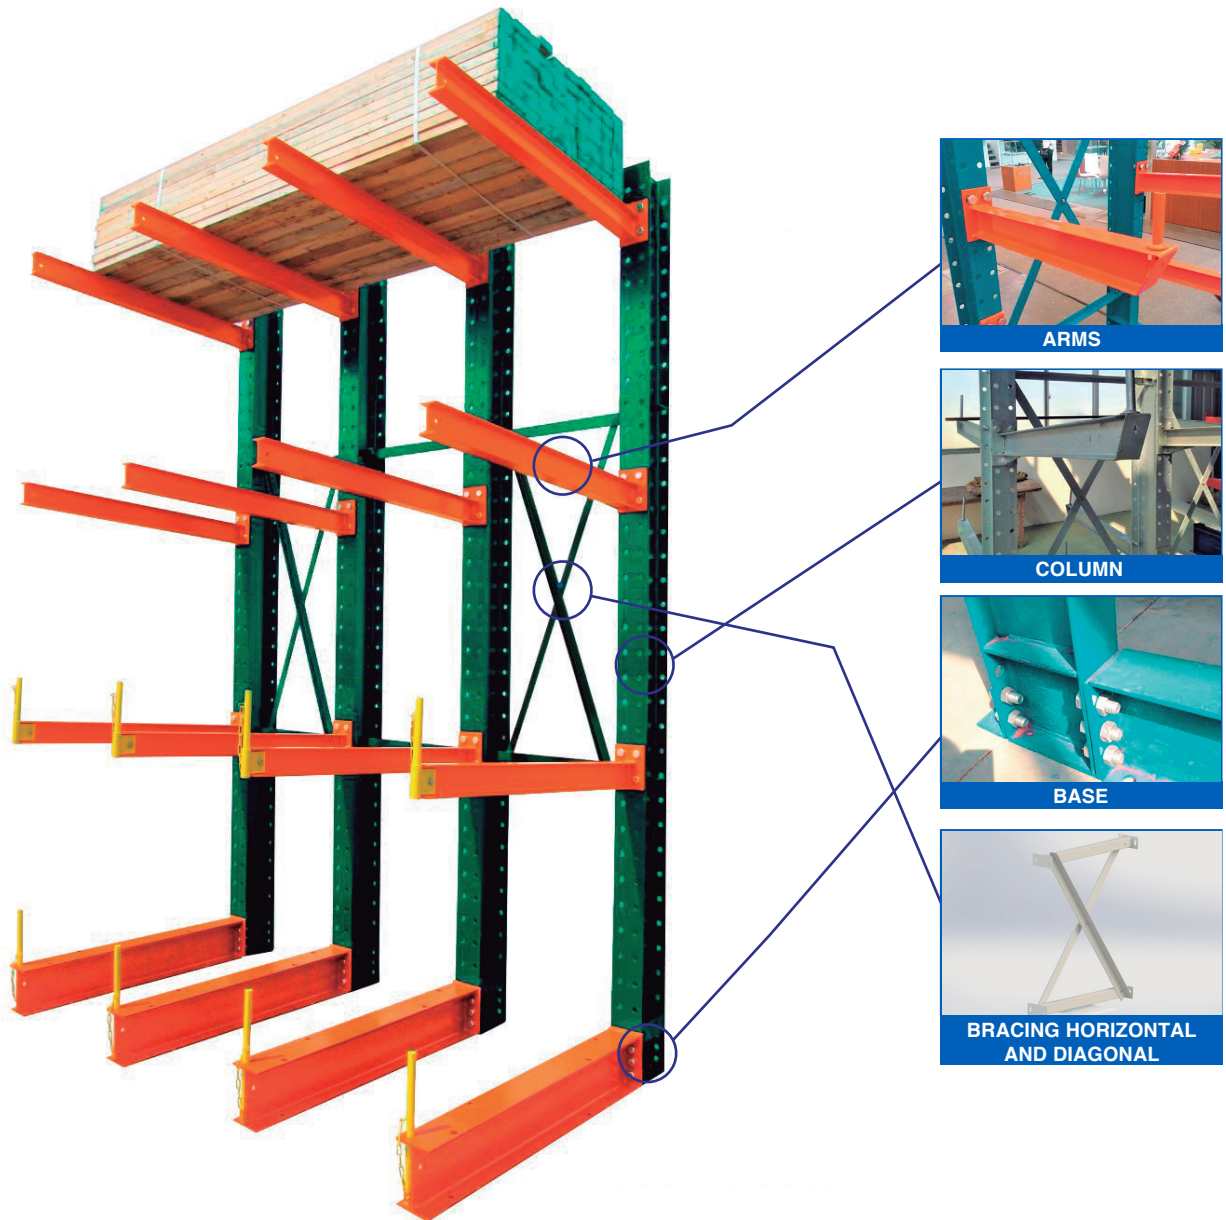

The arms accommodate long, bulky items, loads of differing lengths can be stored on the same cantilever rack and even at the same level, which gives great flexibility to this system.

## ADVANTAGES

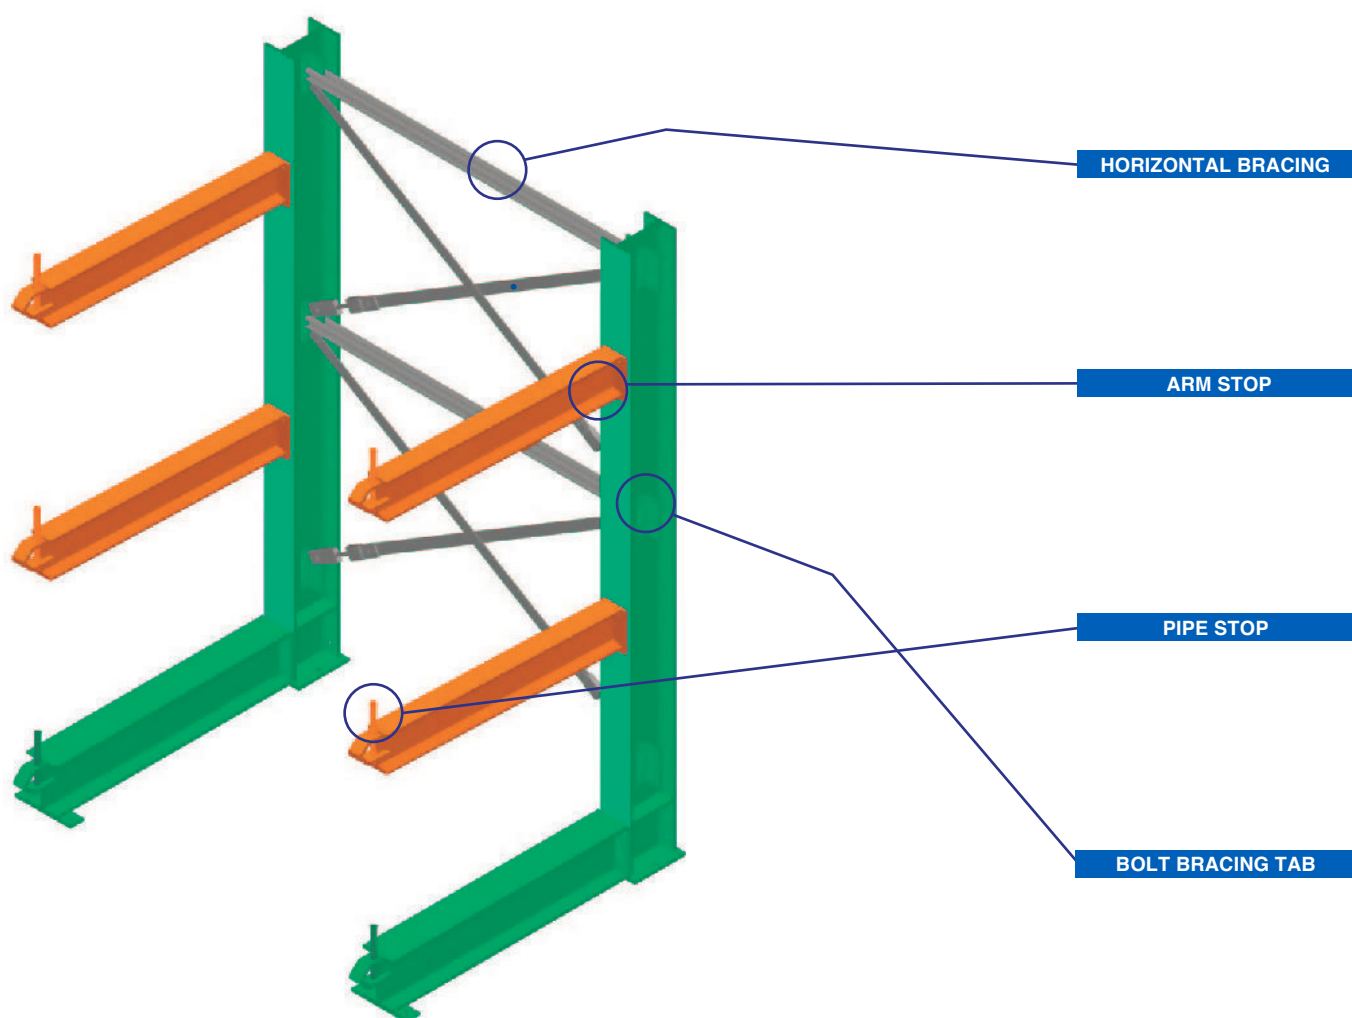

- Flexible placement of arms at different heights of racking structure.
- Storage flexibility.

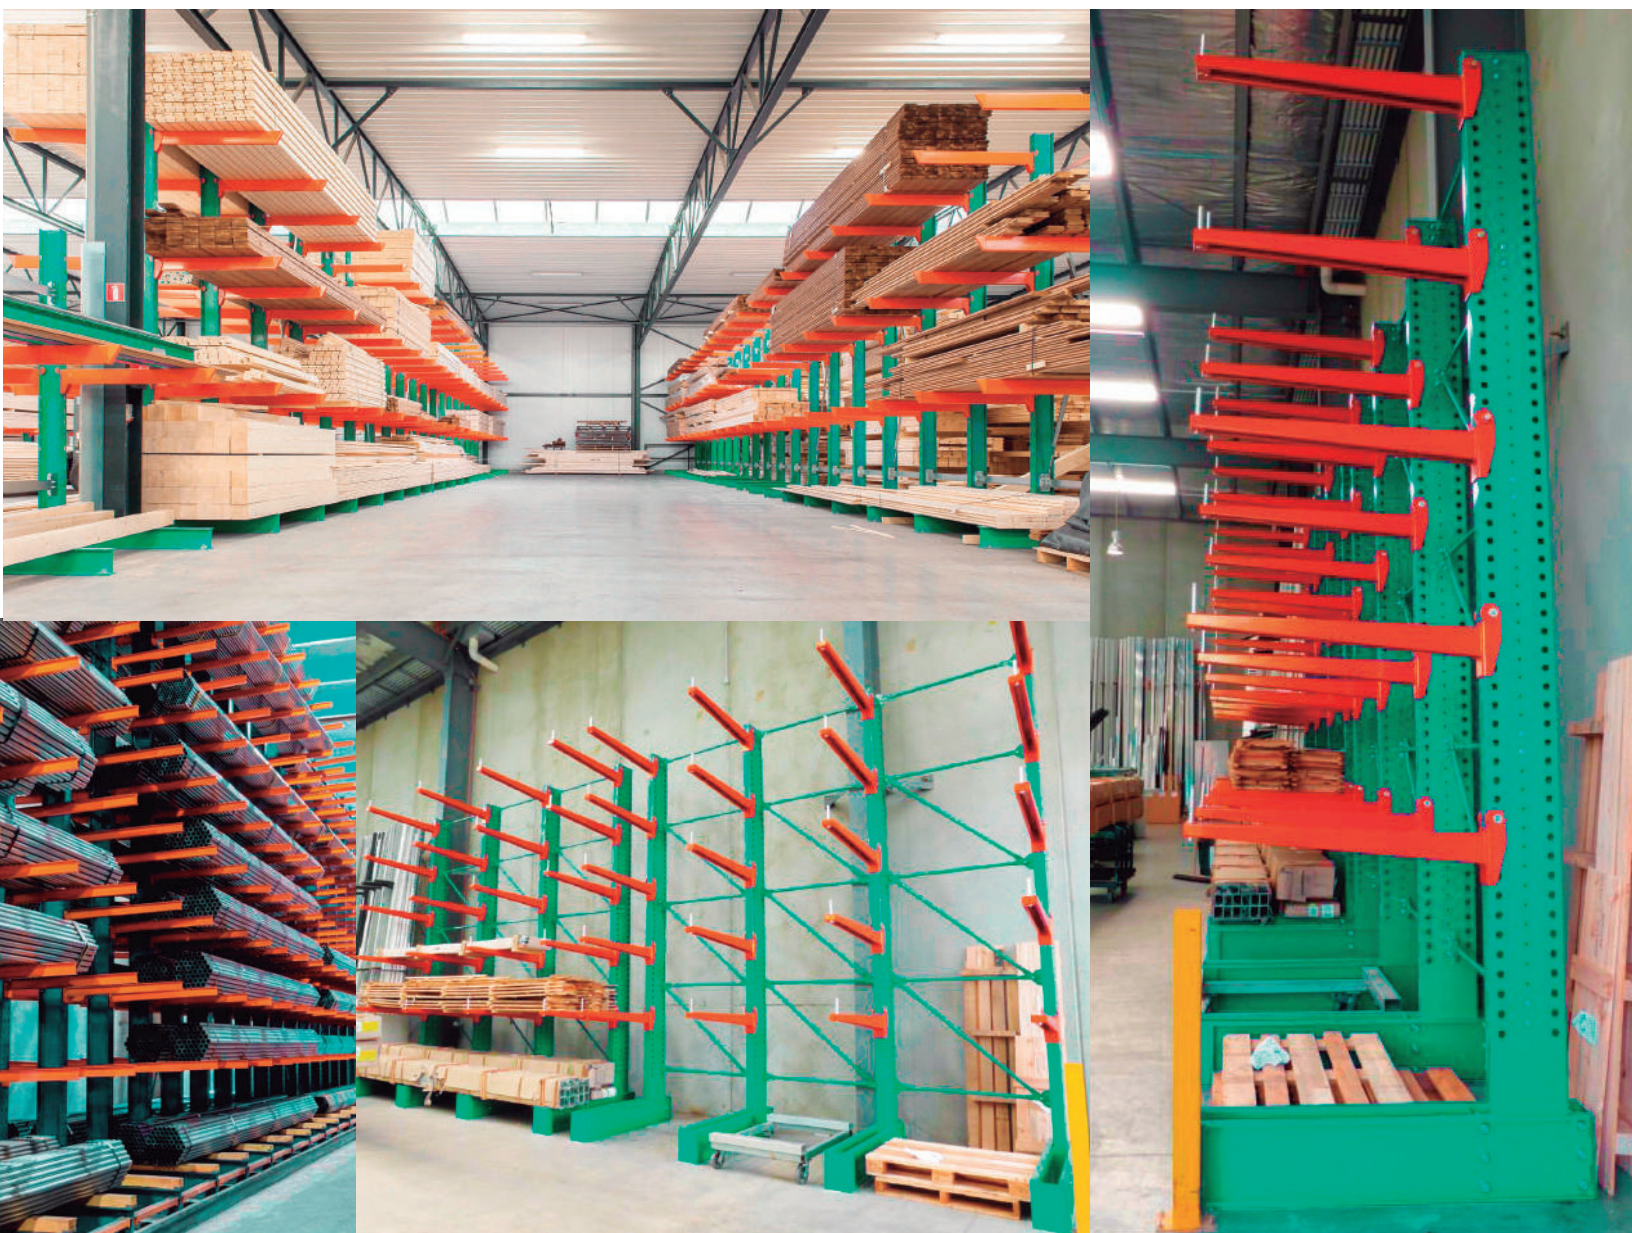

# COMPONENTS

# APPLICATIONS

Ideal to store: Lumber and wood products, furniture, doors, rugs, fabric rolls, pipes, tubes, extrusions, steel bars

**STEEL SHELVING**

**DRIVE-IN RACKING**
